Potential competing interests: No potential competing interests to declare.

Without a deep penetration into the substantive content of the article, terminological inaccuracies are already visible at the title level. The title "Relativistic Acceleration Described by Newtonian Mechanic" should refer to the term "Relativistic Acceleration" found in Science.

The author had the title in mind "Relativistic acceleration motion Described by Newtonian Mechanic". Please do a Google search that "Relativistic Acceleration" means something else. For example, it means what is defined in these articles:

1. <http://przyrbwn.icm.edu.pl/APP/PDF/139/app139z4p06.pdf>
2. <https://www.sciencedirect.com/science/article/pii/S2211379721002758>

In both articles, "Relativistic Acceleration" is in the keywords.
