Review of: "Yield Forecasting Model for Maize Using Satellite Multispectral Imagery Driven Vegetation Indices"

Kanak N. Moharir[1]

1 Banasthali University

1. Paper is good.

2. Abstract arranged well.

3. References are very scarce in the introduction part. Read some more papers related to this topic and add some recent references.

4. Maps are not clear.

5. In **Figure 2.** Location of the selected 20 maize fields (red triangles) over Kaharole, Dinajpur, but in the figure, the red field is not present, and in the legend, the author shows the union boundary, but the boundary is missing on the map.

6. Table No. 1 is not arranged well.

7. Fig. No. 3 legend and scale are not clear.
