

Review of: "Optimizing Energy Efficiency for Connected and Autonomous Electric Vehicles in the Context of Vehicle-Traffic Interaction"

Nikolaos M. Manousakis¹

¹ University of West Attica

Potential competing interests: No potential competing interests to declare.

_The contributions of the paper must be clearly defined.

_The selection of parameters in Table 1 should be further commented. How their selection affect the results?

_The adoption of a metric would be more helpful to quantify the results.
