I have some comments on your manuscript entitled "Factors influencing variable symptoms of COVID-19 patients and proposed revision of public policy for COVID-19 vaccination" which are as follows.

1. The questions left unanswered (limitations of your manuscript) is missing in your abstract section. Write the same in the last line of the abstract section along with future prospects.
2. The last paragraph of the intro section should be more specific about your major objectives and approaches utilized in the study of your manuscript.
3. Recent update about COVID-19 is missing in your manuscript.
4. Write a separate discussion section of about 1000 words just before the conclusion section.
5. Cite relevant PMID: 36092161 and PMID: 33091590 in your manuscript.
6. A separate well designed figure will be needed for your manuscript.
7. Complete editorial checking will be needed for your manuscript.
