Potential competing interests: No potential competing interests to declare.

1. In the abstract, you mentioned 7 diets. However, in the method section, you mentioned 8 treatments. Please check.
2. In the method section, it is mentioned that <A total of 160*O. niloticus* fingerlings were used in this study with a stocking rate of 20 fish per aquarium.>, i.e., you used only 8 tanks. However, you mentioned in the abstract that the experiment was conducted with 3 replications. Therefore, 21 aquariums are necessary. Please check.
3. Feed formulation/compositions are not provided.
4. In the method section, there is a section called microbiological sample collection and analysis. However, the results should have been presented or discussed in relevant sections. Please check.
5. Shift the sub-sections viz., *Proximate Composition of individual feed ingredients*, *Proximate Composition of experimental diets*, and *Energy levels in the diets* from the results section to the method section.
6. Merge Table 3 with Table 2.
7. Add references for the acceptable range in Table 4.
8. The discussion section needs improvement, especially in reasoning through the results obtained.
9. Significant improvement is needed in English grammar and language.
