Potential competing interests: No potential competing interests to declare.

Firstly, the topic indeed is very informative. Based on the results, it's clearly evident that fostering emotional intelligence skills is essential for enhancing the well-being of students as well as teachers. However, there is a need to increase the quality of the paper by incorporating important changes. For example, the sample is not clearly defined in terms of how it was calculated. Moreover, expanding the discussion and conclusion sections will significantly enhance the article's contribution. Good luck.
