X-linked adrenoleukodystrophy

INSERM

Source

INSERM. (1999). Orphanet: an online rare disease and orphan drug data base. X-linked adrenoleukodystrophy. ORPHA:43

X-linked adrenoleukodystrophy (X-ALD) is a peroxisomal disorder resulting in cerebral demyelination, axonal dysfunction in the spinal cord leading to spastic paraplegia, adrenal insufficiency and in some cases testicular insufficiency.
