Potential competing interests: No potential competing interests to declare.

This article offers a thought-provoking exploration of the near-death experience (NDE) phenomenon through a philosophical lens. The author effectively synthesizes various philosophical perspectives to analyze the significance of NDEs in shaping beliefs about life after death. However, the article would benefit from further engagement with empirical research on NDEs to strengthen its argumentation and provide a more comprehensive analysis. Additionally, incorporating counterarguments and addressing potential limitations in the philosophical framework would enhance the depth and rigor of the discussion. Overall, this article presents a compelling foundation for further inquiry into the intersection of NDEs and philosophical inquiry into immortality.

The following need to be formatted.

Abstract:

There is no info regarding method, results, conclusion, and implications in the abstract.

The following statement in the abstract is not comprehensible. Rephrase and rewrite.

"Following some preliminary discussion, this will be the burden of our song."

Keywords:

Be as specific as possible. Avoid more general words, no need to mention names. Accurately identify the most important topics covered in the piece of content.

Introduction:

Intext citation is not in APA format. Also, the researches mentioned are quite old.

Methodology, Results, Implications

Proper methods, procedures, and samples need to be mentioned. Write theoretical and practical implications.
