Potential competing interests: No potential competing interests to declare.

I am pleased to recommend the acceptance of the manuscript titled "Increasing Renewables and Building Retrofit in a Coal-Based Cogeneration District Heating System" for publication in this journal. The paper demonstrates rigorous analysis, an innovative methodology, and contributes significantly to the field of heating systems. The research is well-executed, the results are compelling, and the writing is clear. I believe this work will make a valuable addition to the journal, and I recommend its publication without reservation.
