Potential competing interests: No potential competing interests to declare.

1. Author has not mentioned Plant Voucher Numbers
2. Explain why only female rats selected for study
3. To obtain statistical significance Minimum 6 animals should be used, but the author used only 5 animals.
4. Detailed treatment should be mentioned.
5. To arrive at the perfect conclusion, the author conducted tests may not be sufficient.
6. Discussion should be strengthened by phytoconstituents present in the plant/s
7. Need major revision.
