Review of: "A Review of Grouper Fisheries Management in the Southeastern and Caribbean U.S.: Challenges, Successes, and Future Directions"

Matt Damiano¹

1. Southeast Fisheries Science Center, National Oceanic and Atmospheric Administration, Washington, D.C., United States

Hi Manuel, thank you for the opportunity to review this manuscript. I think that many of the conclusions you made concerning grouper management and future research in the Southeast US region are logical and well-supported by the numerous case studies described throughout. In general, I am supportive of this publication. I provide numerous comments and suggestions throughout the annotated manuscript PDF attached. I think that the fundamental structure of the manuscript is good, but that additional detail will be helpful in several sections as outlined in my comments. I am happy to discuss my comments further with you as needed. Cheers - Matt
