Potential competing interests: No potential competing interests to declare.

The article on the use of artificial intelligence (AI) in academic research provides a deep and well-structured insight into the current capabilities and limitations of AI generative models in the academic context. While the article is filled with valuable information and offers important recommendations for various stakeholders in research, there are some aspects that could benefit from further exploration and clarity. This work provides a comprehensive and enlightening view of the use of AI in academic research and offers valuable recommendations for researchers, developers, and academic institutions. However, the inclusion of concrete examples and practical resources would have further strengthened its applicability and utility for the academic community. Despite these suggestions for improvement, the article represents an important step in understanding how AI can ethically and responsibly enhance academic research.
