Tubulin-Specific Chaperone Cofactor E-Like Protein

National Cancer Institute

Source

National Cancer Institute. *Tubulin-Specific Chaperone Cofactor E-Like Protein*. NCI Thesaurus. Code C114423.

Tubulin-specific chaperone cofactor E-like protein (424 aa, ~48 kDa) is encoded by the human TBCEL gene. This protein is involved in the regulation of microtubule dynamics through the modulation of tubulin degradation.
