Potential competing interests: No potential competing interests to declare.

The theoretical framework and introduction were written properly and included a summary of the study's history to guarantee that readers understood all of the topics covered in the article. The methodology is intriguing and effectively explains the results and the findings. The well-organized, thoroughly studied, and easily comprehensible results are presented in the discussion and findings section for individuals outside the cultural setting. The study even included recommendations for new topics that should be investigated by researchers in the future. Overall, the article is fascinating, offers fresh insights, and advances the paradigm of knowing in the author's area of expertise.
