

Review of: "Fluoxetine plus lithium for treatment of mental health impairment in Long Covid"

Jeyasakthy Saniasiaya

Potential competing interests: The author(s) declared that no potential competing interests exist.

The authors aim to address the treatment of long COVID-19 syndrome by advocating lithium plus fluoxetine. The manuscript is interesting. However, there are a few concerns that need to be addressed.

1. Please define LONG COVID-19 syndrome ([https://www.who.int/news-room/questions-and-answers/item/coronavirus-disease-\(covid-19\)-post-covid-19-condition](https://www.who.int/news-room/questions-and-answers/item/coronavirus-disease-(covid-19)-post-covid-19-condition))
2. How can mental health in long COVID-19 patients be assessed prior to initiation of treatment
3. Suggested algorithm of treatment and follow-up
