Arthrobacter cumminsii

National Cancer Institute

Source

National Cancer Institute. *Arthrobacter cumminsii*. NCI Thesaurus. Code C114248.

A species of obligately aerobic, Gram positive, irregular shaped bacteria assigned to the phylum Actinobacteria. This bacteria is non-motile, non-spore forming, catalase positive, hydrolyzes gelatin, and does not reduce nitrate. *A. cumminsii* is widely distributed in the environment, especially in soil. It may cause opportunistic infections in humans.
