Potential competing interests: No potential competing interests to declare.

Hi,

There were many useful comments from the reviewers on the structure and contents of your paper, and some of my comments might overlap with theirs.

Abstract - "*To validate this model and ...*"; I think you should be more specific on WHAT model since you are testing Hockerts' model.

Introduction - It would be helpful to talk more about social entrepreneurship itself and how it contributes to their surroundings.

Lit Review - "*Finally, from this review of literature, we propose the research model (figure1) and the following hypotheses*, **please state out the hypotheses.**

Methodology - Need more clarifications as your earlier reviewers had noted several times.

1. You should have a demographic table or at least give more description of your sample in your writing. For example, the average age is 21, but having the standard deviation and/or min-max would be helpful.

2. What do you mean about "*different socio-cultural backgrounds ?*".

3. How did you get your participants?

4. In the "Measurement instruments" section, maybe you have mention how did you establish normality in your data or some data cleaning procedures.

Results - "Test results for the Hockerts model" section, why are you looking at correlations to test the prediction of Hockerts model when you mention you are looking at the structural model? I think you might have to rewrite the whole results section.

Discussion - I think for the current stage of your manuscript, you should improve the previous section before the reviewers can discuss about this section meaningfully.

Format - Please check the citations and references since there are instances of this happening "In a comparative study by

(11), ". Your reference list is not helpful. Please do check your manuscript before submitting.

Minor errors - Please check for typos. For example, '**Figure 1.** Conceptuel model'

I hope you are able to edit your manuscript based on everyone's review soon and looking forward to the improvements.

Good luck!
