Dear author, thank you for the paper. I can see the effort in writing. Interesting topic indeed. Here are some recommendations to help you improve your paper.

Title: Repetitive 'economic' word in your title. Title should be short and precise.

Punctuation: Edit your grammar and punctuation. Writing should be neat. There are many punctuation errors in your paper.

Abstract: Please improvise the abstract. Some tips from Google: 1) State the problem; 2) Present only your key findings (i.e., the main points), making explicit how they address the problem; 3) State the overall significance of the research; 4) Provide background as needed; and 5) Make your writing as clear and accessible as possible.

Introduction: "Ask a problem" should be INTRODUCTION. You must explain the economic ecological model in your paper.

Research method: How did you determine the sampling size? Why chose that method? Explain the chosen method. Why did you choose the economic ecological model? Justifications for these should be in the research method.

RESULTS: "Much for the land??" Is it a typing error? Elaborate more on the findings, and you need to relate them to how climate change is affecting the changes.

Citation & references: Improve on in-text citation.
