**Potential competing interests:** No potential competing interests to declare.

It is an interesting Review focused on Zymography as important technique to evaluate performances of their activity. It merits to be published as soon as possible. It presented an historical introduction from the early beginning of the development of the methods related until today. It was briefly showed and mentioned the different strategies applied and versatilities achieved at each ones. As possible additions, it is suggested in the Abstract to add more updated information related with recent developments. In similar manner, consider to incorporate more examples of recent publications in order to even highlight more the impact of the technique. As well it could be evaluated the possibility to add further perspectives of the technology in the near and far future based on current ongoing Research. These are just suggestions to add more information certainly required by readers due to the high expectations and impact of the Research within Life Sciences. So, the manuscript is accepted for publication after Reviewing.
