Dear Author(s),

I am pleased to evaluate the related study.

The study needs to be reviewed again, paying attention to the following points:

- The main purpose and main problem should be mentioned in the abstract.
- It should be stated which gap in the literature is aimed to be filled while this study is being conducted.
- Due to the format of a study, it is desirable to have the following titles and should be added to this study: introduction, methods, results, discussion and conclusions.
- While scanning the literature, it should be ensured that all outsourcing models are included by year.
- Conclusion or Discussion section should definitely be added, because what is explained in the challenges section is very weak, needs to be expanded and is not linked to the conclusion.
- More current references should be added.

Good Luck,

S.K.
