

Review of: "Use of a Winery's website for wine tourism development: Niagara region"

Tamara Gajić

Potential competing interests: No potential competing interests to declare.

I am grateful to the authors for the interesting topic of the research.

I would like to make some suggestions in order to eliminate minor defects.

The abstract and the introductory part fully fulfill all the required segments. The overview part of the manuscript very clearly presents the segments that make up the goal, the essence of the research, and the elements of the research. The methodology is completely clearly and precisely explained in the manuscript, and the results are presented very extensively and broadly, which is good for potential readers.

The results are presented through clear charts, tables, and figures. No changes are required.

I suggest strengthening the conclusion and discussion part. Missing parts such as limiting circumstances, theoretical implications for future research.

I suggest the following reference: Travelers' (in)Resilience to Environmental Risks Emphasized in The Media and Their Redirecting to Medical Destinations: Enhancing Sustainability. (2023). 15(21), 15297;
<https://doi.org/10.3390/su152115297>

Also, I suggest supplementing the literature. There are very few references for this fine manuscript and strong research.

After minor corrections, I suggest publication.
