Potential competing interests: No potential competing interests to declare.

In addition, one of the tables that can be added to the article is the table of anthropometric and demographic variables, which shows the uniform and normal distribution of the two groups.

It is better to express the 6 tables presented in the article in the form of two tables.

There is no significant problem in the rest of the article.

There are a lot of similar works; in the whole article, there is no significant innovation.
