Potential competing interests: No potential competing interests to declare.

Topic:

The topic of preventing children's sexual harassment is of paramount importance and deserves scholarly attention. It is a pervasive issue that requires proactive measures. Consider clarifying the specific scope or aspects of children's sexual harassment that the article aims to address.

Abstract & Keywords:

The abstract provides a concise yet informative overview of the article. To enhance discoverability and accessibility, add more specific keywords related to the topic, such as "child protection," "sexual abuse prevention," or "responsibility in child safety."

Goal:

The article's goal, to explore models of responsibility in preventing children's sexual harassment, is well-stated and aligns with the topic. It would be beneficial to elaborate on the significance of the research and its potential implications for policy and practice.

Article Structure:

The article's structure is clear and logical, with well-organized headings and subheadings. Ensure a smooth transition between sections to maintain reader engagement. Consider using cross-references between sections when applicable to provide a sense of cohesion.

Introduction:

The introduction effectively sets the context by explaining the significance of addressing children's sexual harassment. To create a sense of urgency, consider incorporating recent statistics or notable cases related to the issue. This can help readers understand the gravity of the problem.

Methods:

The Methods section outlines the research methodology clearly. While the section is informative, it would benefit from a more detailed description of data collection techniques and analysis methods to ensure transparency and replicability.

Result and Discussion:

Each section is appropriately structured and the presentation of results and discussions is coherent. In the Discussion

sections, provide deeper insights into the implications and relevance of the findings for each context (families, communities, educational institutions). Include practical examples or case studies when possible.

Conclusion:

The conclusion effectively summarizes the main takeaways and reinforces the importance of addressing children's sexual harassment. To provide a clear call to action, consider incorporating some specific recommendations within the conclusion, urging stakeholders to take responsibility.

Recommendation:

The recommendations are essential and logically follow the research findings. To enhance practicality, make the recommendations more actionable by specifying concrete steps for different stakeholders (e.g., policymakers, parents, educators).

References & Citations:

The reference list appears comprehensive and reflects a thorough literature review. Double-check the reference list to ensure that all in-text citations are included, and make sure the citation style is consistent throughout the article.

Open Problems:

Mentioning open problems is a thoughtful addition, pointing toward future research opportunities. Provide more context or potential avenues for addressing these open problems in the future. Consider suggesting research questions or methodologies for future scholars.
