Dear Authors,

I am pleased to review an article entitled "Supply Chain and Digital Transformation of the Automotive Manufacturing Company during the COVID-19 Pandemic: A Case Study of PT". Interesting topic and there many theoretical and practical implications. However, I see a room for improvement and invite you to follow my suggestions below:

1. The abstract could be restructured and be shaped in a more classical, informative, and easy-to-navigate way: problem statement, aim, methods, finding, results, implications.
2. PT.X must be explicitly defined, described and explained at the beginning of introduction.
3. The COVID-19 pandemic changes in business and industries should be explained referring to academic literature, maybe involving a cross-industries overview, at least a paragraph. For example, please see: Glebova, E., Zare, F., Desbordes, M., & Géczi, G. (2022). COVID-19 Sport Transformation: New Challenges and New Opportunities. *Physical Culture and Sport. Studies and Research*, 95(1), 54-67.
4. Authors mention this manuscript as a "chapter". Is not it an article? Please revise.
5. Sections 2 and 3 should "dig deeper" and articulate the analysis in the greater detail.
6. In section 5 (and conclusion) please explain the points explicitly and please avoid bullet points. This section should have more flow and be much more informative in general
7. Please involve methods and theoretical background, including the extend the literature list and academic citations.

Thank you for your attention.
