**Potential competing interests:** No potential competing interests to declare.

1. A good paper—congratulations! However, if the authors can add more explanation on AIS and its examples, it would be good.
2. Does AIS also refer to LMS, where students can get their learning materials and interact with the lecturer?
3. Perceived ease of use and perceived benefits have been widely tested and will always yield a positive relationship; it will be better if you can test other variables in the study such as privacy, information quality, and etc.
4. Add to the discussion on where this research can improve in future scenarios.
