Dear author's

I was pleased to review your manuscript ["Comparative Study between Using Only Vaginal Misoprostol and Using Vaginal Misoprostol and Estradiol Cream for Induction of Labour: Randomized controlled trial"](#). The topic is interesting but is not new.

However, the manuscript should be further improved. In order to improve the manuscript **to have the following comments.**

**The aim:** I recommend you to define the aim of the study in the introduction section. This section should introduce the reader with the general concept of the article.

**Methodology:** the sample of the study is relatively small.

**Discussion** - in this section is mandatory to compare your results with the literature.

What new information brings your article in the literature.

There are some important findings that can improve the outcome and the success rate using Misoprostol + E?

Please specify the limitations of your study.

1. Please modify the references accordingly.

2. **Other points:**

- Punctuations and English reviews are necessary;
