Thyroid Gland Noninvasive Follicular Neoplasm with Papillary-Like Nuclear Features

National Cancer Institute

Source

National Cancer Institute. *Thyroid Gland Noninvasive Follicular Neoplasm with Papillary-Like Nuclear Features*. NCI Thesaurus. Code C126598.

A non-invasive neoplasm of thyroid follicular cells with a follicular growth pattern and nuclear features of papillary thyroid carcinoma that has an extremely low malignant potential. These tumors were formerly classified as non-invasive encapsulated follicular variant of papillary thyroid carcinoma or well-differentiated tumor of uncertain malignant potential. (WHO 2017)
