## Abstract:

The abstract should contain the following:

1. Rationale of the study
2. Research gap that you are exploring
3. Specific objectives
4. Specific methodology adopted
5. Results with statistics
6. 1-2 lines of conclusion/implication of the study

## Introduction:

The introduction in the paper is too short to include some related studies with their references so that readers can get familiar with the research already conducted.

## Material and Methods

What is the unit of elevation in fig. 1?

## Results and discussion

The results and discussion materials mentioned in the paper are part of the material and methods... the results should be related to the study's outcome and then generate discussion based on the previous studies conducted/data.

Figure 3 looks at the lithology of the study area. It would help if you validated that ...

Figure 4 is not the soil texture but different grades of loamy soils ... there are 12 classes of soil texture .....

Recommendation: I think the paper needs significant technical improvement before it can be considered for publication.
