

Review of: "Objectivity and Honesty in Science: The case of Light Interference Phenomena"

Enrico Castelli Gattinara

Potential competing interests: No potential competing interests to declare.

The article is very interesting and puts the problem well.

The introduction is clear and compelling.

I would have explained what happened to Young in England in the early 1800s, if he continued to work and how, because nothing is said about it and he only seems opposed, instead he covered important roles.

Correct:

Experimentum Crusis = Experimentum Crucis

Note 5 there is an error (it is not Louis XVI, who was executed in 1793!!)

Note 49 the e is missing from the word "not"

Note 99 François Arago, Histoire de ma jeunesse, Brussels and ~~Lepzig~~ = Leipzig

Note 100 *thi* instead of *the*

Note 104 the quote La nature ne soucie pas des difficiles analytiques lacks an "se": La nature ~~ne~~ se soucie pas des difficiles analytiques

Bibliography: François Arago, Histoire de ma jeunesse, Brussels and ~~Lepzig~~: Leipzig
