Potential competing interests: No potential competing interests to declare.

The abstract needed to be revised as follows, objectives, method, results, and contribution.

The past studies are not up-to-date and comprehensive enough needed to be updated with the most recent papers related to the framework/model used.

The manuscript has not addressed the research gaps in past studies to fill them and show the study contributions in the framework/model used.

The establishment of the framework/model and showing their contribution to the knowledge gaps based on the past studies gaps filling to show the study contributions should be written.

The results generated should be explained based on the study issues and the findings of the past studies should be written based on the comparison of the past studies' findings.

It should be recommendations based on the study findings and policy implications based on the study's most significant findings.

The study limitations and suggestions for further studies should be added.
