# Review of: "New Approach for Targeting Small Molecule Candidates for Intrinsically Disordered Proteins"

Necmi Dege<sup>1</sup>

1. Ondokuz Mayıs University Samsun, Turkey

I reviewed the manuscript titled "New Approach for Targeting Small Molecule Candidates for Intrinsically Disordered Proteins" as a referee.

The manuscript is carefully written, and the motivation for the research undertaken is well explained.

I think that this study is an important one. In order to increase the quality of the article and to offer a wider perspective to readers,

I believe that it will contribute to the scientific literature and benefit scientists if published with the minor revisions I mentioned below.

1- What is the methodology used to select proteins in molecular docking?

2- The author must improve the conclusion part with the important findings of this work.

3- The number of references needs to be increased, and up-to-date references need to be added. For this, I recommend that you read and benefit from the articles below.

<https://doi.org/10.1016/j.molstruc.2021.130005>

<https://doi.org/10.55730/1300-0527.3460>

<https://doi.org/10.1016/j.bioorg.2021.104798>

<https://doi.org/10.1039/D0RA02525A>

<https://doi.org/10.1016/j.compbiolchem.2023.107880>

4- To correct grammatical errors, it should be read by someone with good English, and grammatical errors should be corrected.

With minor revisions, I am of the opinion that the article can be suitable for publication in the "" named journal.
