Dear Authors,

The paper is overall well-written. Please consider:

Ensure that the abstract concisely summarizes the study's objective, methodology, key findings, and implications. The introduction should clearly define the research problem and its significance.

Broaden the literature review to include more recent studies and diverse perspectives. This can provide a more comprehensive understanding of the research context.

Expand the discussion section to more deeply explore the implications of your findings for theory, practice, and policy, especially in the African context.

Offer more detailed recommendations for MSMEs, policymakers, and practitioners. Outline potential areas for future research to address gaps identified in your study.

Kind regards,

Reviewer
