

Review of: "Product Development of a Digital Platform for Integrated E-Procurement of Customized Component Parts Solution, "Eproccos""

Dipankar Chakrabarti

Potential competing interests: No potential competing interests to declare.

The paper is details of a project to develop a product. It lacks academic flavor. The I4.0 is referred to loosely and no details of implementation is mentioned. The abstract does not clarify what the paper is describing. To make this as case study the authors should provide the methodology they followed - any theory that they are developing or testing and how the actors are playing their role. The conclusion needs to have theoretical and practical implication of the work.

Substantial work needs to be done to make this as an academic paper.
