Potential competing interests: No potential competing interests to declare.

Abstract should report some novel quantitative results and novelty

At the end of the introduction, needs to express the deficiency and objective to achieve with the novelty of research

Typing formulas should be corrected and stated correctly, even the turbulent model

Fig. 3: what is coarse, fine, etc., numbers?

What is the convergence criterion?

Fig. 4 a, b, c should be written in the caption; similarly, others too

Verification with similar research of others should be presented

Discussion should be improved

Novelty should be explained clearly
