

# Review of: "Epilepsy surgery in tuberous sclerosis: An overview of neurosurgical concerns in a low-income country"

Dr.Dawit Zena

**Potential competing interests:** The author(s) declared that no potential competing interests exist.

**General comment;**

-I really appreciate the manuscript authors, the study prove the existing scientific evidence.

**Specific comments;**

#1- it will be good if you mention operational definition for “early onset seizure”

#2- on background part; 2nd sentence says “There is growing evidence that early seizure control may adversely affect the development of cognitive skills and social bahaviour in children with tuberous sclerosis complex”-What does it means?

#3-it is better to use the term "anti-seizure medications" in place of the term “anti-epileptic drugs” which is mentioned in the entire manuscript.
