

Review of: "The Outcomes of Emergency Admissions and Associated Factors Among Children Admitted to the Pediatric Emergency Unit at Selected Public Hospitals in Addis Ababa, Ethiopia — A Retrospective Cross-Sectional Study"

Venu Shah

Potential competing interests: No potential competing interests to declare.

Overall, the manuscript is very well written, with inclusion of all necessary components. Following suggestions can be considered in revision:

-Introduction can be cut short.

-How did the author look for the nutritional status of the study participants? - This should be mentioned in the method section.

-Recommendations that are not based on the study findings can be removed.
