Old or Age Indeterminate Septal Myocardial Infarction by ECG Finding

National Cancer Institute

Source

National Cancer Institute. *Old or Age Indeterminate Septal Myocardial Infarction by ECG Finding*. NCI Thesaurus. Code C102693.

An electrocardiographic finding of pathologic Q waves in leads V1, V2 and often V3, which is suggestive of myocardial infarction of the intraventricular septum, without evidence of current or ongoing acute infarction. (CDISC)
