Dear author, congratulations on your work. I have some suggestions to improve.

Scientific names can only be abbreviated in the middle of sentences. It cannot be abbreviated at the beginning of the sentence. Correct this throughout the text.

In table 1, add the biological activities of the chemical constituents.

Add a topic describing the methodology used for your article. What type of review?

Add photos of the botanical species you are working on.

In topic 3, it is messed up. You must start from the largest taxonomic category (Kingdom) to the smallest category (Species).
