R-CODOX-M/R-IVAC Regimen

National Cancer Institute

Source

National Cancer Institute. *R-CODOX-M/R-IVAC Regimen*. NCI Thesaurus. Code C160570.

A chemoimmunotherapy regimen that alternates rituximab, cyclophosphamide, vincristine, doxorubicin and high-dose methotrexate (R-CODOX-M) with rituximab, ifosfamide, etoposide and high-dose cytarabine (R-IVAC), and can be used in the treatment of non-Hodgkin lymphoma (NHL).
