Potential competing interests: No potential competing interests to declare.

1. In the manuscript, please avoid using WE, I, OUR, and other such pronouns. Authors can use alternatives, e.g., "This study reports.." instead of "our study reports."
2. The abstract seems very concise. Please add a few more details about the results obtained, etc.
3. Abstract: the interest in conducting research on butterflies has increased all over the world - delete "only."
4. adverse change in their habitat - changes
5. In the present study, we are reporting - This study reports
6. Please italicize all genus and species names.
7. In September 2024, the second author happened to observe a butterfly larva on a classroom desk during the morning hours: This statement is not of scientific interest.
8. This study is only a single butterfly finding. What is its significance? Is it endangered? How is its presence of importance?
9. The butterfly was found only on the college campus. Does it indicate that it is present in the entire Nagpur?
10. A survey at other probable locations where it can be found would be a good supplement to this article.
