Although the topic of the paper was a bit far from my expertise, I acknowledge the high level of expertise and the good structure of the paper. It is well written and it express with clarity the main idea of the paper. The only suggestion for improvement that I could see to strength the argument of the paper is presenting the state of the art that led the MED approach to outstand over the past approaches. Also, I was missing a graphical comparison of the results of this new MED approach contrasted with previous ones.
