Potential competing interests: No potential competing interests to declare.

1. I suggest for the title: Cultural Lockdown during the COVID-19 Pandemic: Respite for Brahminy Kite Population – A Limited Case Study in La Union, Philippines
2. The abstract should contain the research results at the end of the paragraph
3. Your research actually only focuses on the Brahminy Kite population, not on biodiversity as a whole. Because if we discuss biodiversity as a whole, it is very broad. So, your background in expressing the reasons why this research is important needs to be added to whether it is because this animal population is important. The importance here could be due to its rarity or because it is protected by the laws in the Philippines.
4. Mention the research aims in the last paragraph of introduction
5. What kind of data will be obtained and how to analyze the data?  
And how will you analyze and correlate between the Brahminy kite population and the Covid 19 pandemic level? Write it in the method
6. Where is the discussion? You have to discuss the result how and why it became. You should refer the references to discuss it.
7. Conclusions: Focus on answer of the aim of the research that mentioned in the last paragraph of the introduction
8. The number of references is still very minimal, it needs to be increased, at least 30
