Potential competing interests: The author(s) declared that no potential competing interests exist.

This is an ambitious article, trying to plan the architectonic of a metatheory of addiction. The article is well-written and motivating to read. What is principally exceptional is the multifaceted discussion of the phenomenology of addiction, the references to build are previously 2017, so only can find 2 references of last 5 years .

I would suggest that the authors could include the methods of literature review, documentation/analysis and presentation.
