Potential competing interests: No potential competing interests to declare.

I received, for evaluation, access to the text entitled "Sola Scriptura to Improve the Quality of Christian Students in Thinking Characteristics". It is a fundamentally doctrinaire text, without documental support, without problematization and with a well determined selection of bibliography, in order to reinforce the central thesis of the article, that is, the defense of reading the Bible as a source to forge good character. With this, I do not recommend the publication of the text.
