Potential competing interests: No potential competing interests to declare.

1. Authors have a well-written manuscript.
2. Authors mentioned 10 cases of MC out of 51,342 patients' consultations, and what is the status of the 51,342 patients? How did the authors classify such a huge population?
3. Typo error in Table – 1, S. no. 4 in the lesions column should change "Thigh" instead of "Tight."
4. Results section: Line no: 4, kindly delete one "had."

Line No: 29 & 30: Kindly rephrase the following sentence: "The remaining 5 cases were treated with imiquimod, applying the cream directly to the lesions nightly, 5 days a week, for 4 weeks."

5. Discussion part:

Line No: 21 & 22 – Kindly mark a bracket as mentioned in the following sentence:

"Chlamydia must be checked for, and pelvic inflammatory disease (PID) must be ruled out.
