Anti-CTLA-4 Monoclonal Antibody MK-1308

National Cancer Institute

Source

National Cancer Institute. *Anti-CTLA-4 Monoclonal Antibody MK-1308*. NCI Thesaurus. Code C150679.

A monoclonal antibody directed against the human T-cell-expressed receptor cytotoxic T-lymphocyte-associated antigen 4 (CTLA4; CTLA-4), with potential immune checkpoint inhibitory and antineoplastic activities. Upon administration, anti-CTLA4 monoclonal antibody MK-1308 targets and binds to CTLA4 expressed on T-cells and inhibits the CTLA4-mediated downregulation of T-cell activation. This leads to a cytotoxic T-lymphocyte (CTL)-mediated immune response against cancer cells. CTLA4, an inhibitory receptor and member of the immunoglobulin superfamily, plays a key role in the downregulation of the immune system.
