Thanks for inviting me to review the manuscript titled "Giardia lamblia Infection and Associated Risk Factors Among Patients Seeking Stool Examination at Bule Hora University Teaching Hospital, West Guji Zone, Ethiopia" for Qeios. Overall, I found the methodologies appropriate, the study objectives well-defined, and the research highly relevant, providing valuable insights into basic epidemiological questions.

However, while reviewing the manuscript, I noticed some issues with the English language proficiency that may hinder the clarity and impact of the research. Although I attempted to perform some language editing, I believe that further expert review is necessary to ensure the manuscript's readability and coherence.

To facilitate the improvement of the manuscript's language quality, I would like to offer some specific suggestions for language editing. These may include correcting grammatical errors, improving sentence structure, enhancing clarity, and ensuring consistency throughout the text.

I appreciate the significance of the research findings and believe that enhancing the language quality of your manuscript will amplify its impact and reach within the scientific community. Therefore, I encourage the author(s) to consider engaging an expert language editor or seeking assistance from colleagues proficient in English to refine the manuscript further.

I look forward to seeing the revised version of your manuscript and its potential contribution to the field of epidemiology.

I have attached the revised manuscript for your perusal and necessary corrections.

Thank you for your attention to this matter, and I commend you on the valuable research you have conducted.
