Potential competing interests: No potential competing interests to declare.

The idea is good for defining the causes of mycetoma in animals, but the review required correction.

-The required points have been defined in the attached copy; the author should follow it for correction.

-All the scientific names for the etiological pathogens should be written in italics.

- The abstract should be rewritten.
- More details about treatment in different animal species should be mentioned.
- In conclusions, more detail should be added regarding other animals, not only in cats, as the title is mycetoma in animals.
- The review required English proofreading.
