Review of: "A Research Note on Natural Reclamation Processes that Support Mangrove Biodiversity Spheres: Sedimentation in Three Major River Deltas in Northwestern Luzon Using Aerial Imagery"

Tu Le

Potential competing interests: No potential competing interests to declare.

The paper has illustrated a method using multiple tools to measure the sedimentation of the river deltas. This method is helpful and can be applied in other cases. However, the paper should go forward to explain how the role of the current mangrove contributes to keeping the sedimentation.
