Potential competing interests: No potential competing interests to declare.

First of all, it is nice to read your paper. However, I suggest the following improvements:

1. Introduction section:

Needs a smoother connection between these two paragraphs (Paragraph 3 and 4 about teacher training). It's beneficial to explicitly link the broad concepts and policies of educational inclusion to the practical implications and requirements for teacher training. The transition should underscore the necessity for teacher preparedness in implementing these inclusive policies through specific strategies and adjustments within the classroom.

2. It should be a clear concept of attitudes, perception, or belief. You need to define it.

3. Please explain the abbreviations used, e.g., CPI, DT, EAE, etc.

4. It is not clear which statistical test you used for data analysis. Please mention it.

5. The discussion section needs to relate the research findings to previous studies. Please improve.
